-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Specification

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: "which to its cross-section is closed chamber of predetermined shape and free from oxygen".

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims are replete with indefiniteness that is too numerous to point out in every instance. The examples are provided for the applicant use in making corrections wherever appropriate but not specifically pointed to.

In several instances, the claims recite the phrase "characterized in that"; however, it is not clear what is encompassed by the phrase.

Regarding claim 1, the claim recites "for instance between walls" and "for instance placing in it in a space between cooling walls"; however, it is not clear whether the wood block is pressed between the walls.

Regarding claim 2, it is not clear if the walls recited in line 3 the same as the walls recited in line 5 of claim 1.

Regarding claim 4, there is lack of antecedent for the limitation "the sections".

Claim 5 is confusing.

Regarding claim 6 and 7, there is lack of antecedent basis for the limitations "the press" and the compressing part". Further in claim 7, it is not clear what is encompassed by the phrase "in the process as separate units".

Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9, as best understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Kause (WO 94/20273).

Kause reads on the steps of the method of the claimed invention. Kause teaches a method of pressing wood where the wood is compressed with compression cylinders 4 and 5. Intermediate beams 8a and 8b are coupled to wood in order that the wood would not expand substantially expand after compression. The wood is then moved through cover 2 where the wood is heated and cooled. It should be noted that the temperature can be raised over 100°C (page 3).
